Graduate Certificate in Digital Supply Chain Management

What is it?

Success in today's marketplace requires that organizations deliver products and services that provide easily identified value for their customers. This certificate draws on strengths within two departments to integrate source (strategic procurement and supply management), production (manufacturing and service operations), and delivery processes (demand fulfillment), with a focus on the use of information technologies as the critical enabler of supply chain efficiencies and responsiveness.

The Graduate Certificate in Digital Supply Chain Management is designed to give the student the tools and ideas that help shape and define the various components of value creation. Students can gain knowledge and skills in the full spectrum of supply chain activities: supplier relationships, purchasing management, operations and inventory management, logistics and transportation, quality management, and information technology.

When are the classes offered?

Required Core Courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Offering</th>
</tr>
</thead>
<tbody>
<tr>
<td>ERP 5110</td>
<td>ERP Systems Design and Implementation</td>
<td>Offered Fall &amp; Spring</td>
</tr>
<tr>
<td>ERP 5310</td>
<td>Supply Chain Management Systems in an ERP Environment</td>
<td>Offered Fall Semester</td>
</tr>
</tbody>
</table>

Choose one of the following to complete the core requirement:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Offering</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUS 6425</td>
<td>Supply Chain and Project Management</td>
<td>Offered Spring Semester</td>
</tr>
<tr>
<td>ME 5708</td>
<td>Supply Chain and Project Management</td>
<td>Offered Fall Semester</td>
</tr>
</tbody>
</table>

Choose one of the following as an elective course:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Offering</th>
</tr>
</thead>
<tbody>
<tr>
<td>ERP 5410</td>
<td>Use of Business Intelligence</td>
<td>Offered Fall Semester</td>
</tr>
<tr>
<td>ERP 6610</td>
<td>Adv. Customer Relationship Management in ERP Environment</td>
<td>Offered Fall Semester</td>
</tr>
<tr>
<td>ERP 6120</td>
<td>ERP Systems Configuration and Integration</td>
<td>Offered Spring Semester</td>
</tr>
<tr>
<td>ME 5757</td>
<td>Integrated Product and Process Design</td>
<td>Offered Spring Semester</td>
</tr>
<tr>
<td>ME 5656</td>
<td>Design for Manufacture</td>
<td>Offered Spring Semester</td>
</tr>
<tr>
<td>ME 5760</td>
<td>AE 5760 - Probabilistic Engineering Design</td>
<td>Offered Spring Semester</td>
</tr>
<tr>
<td>ME 5763</td>
<td>Principles and Practice of Computer Aided Design</td>
<td>Offered Fall Semester</td>
</tr>
</tbody>
</table>

Admission:

The graduate certificate program is open to all individuals holding a BS, MS or PhD degree in areas such as business, social sciences, technology, engineering, or related disciplines. In order to receive a Graduate Certificate, the student must have an average graduate cumulative grade point of 3.0 or better on a 4.0 scale in the certificate courses taken. Students admitted only to the certificate program will have non-degree graduate status but will earn graduate credit for the courses they complete. If the four-course sequence approved by the graduate advisor is completed with a grade of B or better in each of the courses taken, the student will, upon application, be admitted to the Master of Business Administration or to the Master of Science in Information Science and Technology. The certificate courses taken by students admitted to the program will count towards the MBA program or the M.S. in Information Science and Technology degree program. Once admitted to the Certificate program, a student will be given three years to complete the program as long as a B or better average is maintained in the courses taken.

Course Descriptions:

Required Core Courses:
ERP 5110: Enterprise Resource Planning Systems (ERP) Design and Implementation (Campus/Distance)
This course provides a technical overview of Enterprise Resource Planning Systems and their impact on organizations. SAP’s ERP system is introduced to illustrate the concepts, fundamentals, framework, general information technology context, the technological infrastructure, and integration of business enterprise-wide applications. Prerequisites: IST 1750

ERP 5310 Supply Chain Management Systems in ERP Environment (Campus/Distance)
This course studies the need for supply chain integration and the challenges of managing complex interfaces using the systems approach for the planning, analysis, design, development, and evaluation of supply chain. SAP’s ERP ECC, SCM, BW, and Sybase Unwired Platform are used to deploy SCM applications. Prerequisite: ERP 2110 or preceded or accompanied by ERP 5110

Core Courses (Choose one):
BUS 6425 Supply Chain and Project Management (Campus/Distance)
This course covers operations management and its critical role in developing and maintaining effective and efficient processes in the organization. The use of project management tools is covered for purposes of effectively managing organizational change. Prerequisite: Graduate Standing.

MECH ENG 5708 Rapid Product Design and Optimization (Campus/Distance)
Product Life cycle design; Finding design solutions using optimization technique; Rapid product realization using rapid prototyping and virtual prototyping techniques. Prerequisite: ME 3708.

Elective Courses (Choose one):
ERP 5410 Use of Business Intelligence (Campus/Distance)
This course introduces data-oriented techniques for business intelligence. Topics include Business Intelligence Architecture, Business Analytics, and Enterprise Reporting. SAP Business Information Warehouse, Business Objects, or similar tools will be used to access and present data, generate reports, and perform analysis. Prerequisite: IST 3423 or equivalent; ERP 2110 or preceded or accompanied by ERP 5110.

ERP 6610 Advanced Customer Relationship Management in ERP Environment (Campus/Distance)
Identification (targeting), acquisition, retention, and development (expansion) of (profitable) customers. Effective and efficient management of customers using IT, SAP CRM and SAS BI tools used to enhance student education with real world applications. Research paper and presentation required. Prerequisite: ERP 2110 or preceded or accompanied by ERP 5110.

ERP 6120 Enterprise Resource Planning: Systems Config and Integration (Campus/Distance)
Implementation and design practices for business processes in Enterprise Resource Planning (ERP) systems. The course will examine and apply techniques used in SAP ERP system for system configuration and integration, with a focus on Financial Accounting, logistics, Controlling, and production. Prerequisite: ERP 5110.

MECH ENG 5757 Integrated Product and Process Design (Campus/Distance)
Emphasize design policies of concurrent engineering and teamwork, and documenting of design process knowledge. Integration of various product realization activities covering important aspects of a product life cycle such as “customer” needs analysis, concept generation, concept selection, product modeling, process development, DFX strategies, and end-of-product life options. Prerequisite: Junior or above standing. (Co-listed with ENG MGT 5515)

MECH ENG 5656 Design For Manufacture (Campus/Distance)
Course covers the approach of concurrent product and process design. Topics includes: principle of DFM, New product design process, process capabilities and limitations, Taguchi method, tolerancing and system design, design for assembly and AI techniques for DFM. Prerequisites: MECH ENG 3708, MECH ENG 3653.

MECH ENG/AE 5760 Probabilistic Engineering Design (Campus/Distance)
The course deals with uncertainties in engineering analysis and design at three levels – uncertainty modeling, uncertainty analysis, and design under uncertainty. It covers physics-based reliability analysis and reliability-based design, robustness assessment and robust design, their integration with design simulations, and their engineering applications. Prerequisite: MECH ENG 3708 or AERO ENG 3361.

MECH ENG 363/5763 Principles and Practice Of Computer Aided Design (LEC 2.0 and LAB 1.0) (Campus/Distance)
Fundamentals of computer-aided design including geometric modeling, CAD data exchange, graphics concepts, and finite element analysis. Projects include basic graphics, matrix algebra, automated drafting, free form curve and surface modeling, solid modeling, assembly and drawing, and finite element modeling, using educational and commercial software packages including Unigraphics and Matlab. Prerequisites: Comp Sc 1570,1970 or 1971, MECH ENG 2761, MATH 2222, at least Junior Standing.
